High School

Summary

I'm a full-stack developer with over 3+ years of experience, passionate about crafting dynamic web applications.

I excel in using Next.js, React.js, Node.js, Express, and MongoDB to create innovative and seamless digital solutions.

Always staying on top of tech trends, I'm committed to delivering cutting-edge, user-centric applications.

Experience

Appscrip

Jan 2021 - Dec 2022

Frontend Developer

- Developed a website similar to OLX using Next.js and React.js.
- Created reusable components and integrated APIs for the nurse admin panel.
- Gained proficiency in code management and deployment on an AWS EC2 instance.
- Utilized Git, BitBucket, and Termius for effective code handling and deployment processes.

Velectico Consulting Private Limited

Jan 2023 - Jun 2023

Software Engineer

- Developed an admin dashboard using React.js, Tailwind CSS, and Redux for efficient Demat account creation. Integrated reusable components and APIs, streamlining the review and verification of user accounts."

Growder

July 2023 - Present

Software Engineer

- Developed a fully-featured E-commerce site with comprehensive functionality.
- Engaged in the creation and repair of multiple CMS instances, including API integrations.
- Migration sites from WordPress to React for enhanced website performance. Implemented SEO strategies to optimize the website's ranking on search engines.
- Utilized Python, BeautifulSoup, and Selenium for efficient data scraping from multiple websites.

Personal Projects

Nextjs Marvel EStore ([Website](#), [Github](#))

A fully functional e-commerce store has been developed using Next.js, with MySQL serving as the database and Stripe integrated for payment processing. Additionally, a separate dashboard has been implemented to enable administrators to perform CRUD operations.

Nodejs Social Media REST API ([Github](#))

A backend REST API for a social media platform built using Node.js, Express, and MongoDB. It provides API endpoints to perform basic CRUD operations on user profiles and posts.

React Dashboard ([Website](#), [Github](#))

A feature-rich React dashboard that seamlessly integrates beautifully designed Tailwind CSS components such as tables, sidebars, popups, dialogs, and progress bars. The dashboard offers full functionality, including a secure authentication flow, providing an elegant and intuitive user experience.
